

EEG-1S-22P

AC Charger

(22kW three phase)

A EUNICE
PRODUCT

Introducing the **EEG-1S-22W**, a versatile three-phase electric vehicle charger, designed and manufactured by Eunice Energy Group, in Greece. This stylish charger has a single charging outlet and can be conveniently mounted on a wall or pylon. **Ideal for car parks, shops, office buildings, hotels, and any place where efficiency and limited space are paramount.**

Robust Construction

Built tough to deter vandalism and withstand the elements, our charger ensures durability and longevity (IK10).

Weather Protection Cover

Our charger is protected with its extreme weather-resistant cover (IP55).

Compact Design

Easy to install either on the wall (wall-mounted) or mounted on the ground through a metallic mounting pole.

OCPP Compliance

Ensure seamless integration with industry standards.

LED indicators

Stay informed at a single glance. LED indicators provide real-time charging status updates, ensuring a seamless charging experience.

Overvoltage Protection

The EEG-1S-22W comes equipped with overvoltage protection to safeguard your vehicle and charger.

Custom Color Options

Personalize your charging station with a variety of color choices.
