

EEG-2S-22P

AC Charger

(22kW three phase)

Introducing the **EEG-2S-22P**, a robust three-phase electric vehicle charger designed by Eunice Energy Group. This powerhouse charger comes with two charging sockets, allowing you to charge two electric vehicles simultaneously. Versatile and efficient, it's **the perfect choice for various commercial locations**.

Dual Charging Sockets

With two charging sockets, this charger serves two users at once, reducing wait times and increasing convenience.

Robust Construction

Built to last, the EEG-2S-22P boasts a rugged design, protecting it from vandalism and ensuring durability (IK10).

Weather Protection Cover

Charger is shielded from the elements with its weather protection cover (IP55).

Integrated Surge Protection

Protect your vehicle and charger from unexpected power surges with our surge protection option.

OCPP Compliance

Ensure seamless integration with industry standards.

User Interface

Integrated colored screen and LED indicators provide real-time charging status updates, ensuring a seamless charging experience.

Custom Color Options

Choose from a variety of colors to match your brand or environment.

Easy & Fast Maintenance

Due to the modular design of the charger, any kind of maintenance can be carried out in a very fast and economical way.
