

MaxiCharger DC Compact

DC Charger

Introducing the **MaxiCharger DC Compact**, a game-changer in the world of electric vehicle charging. This ultra-compact charger delivers substantial DC power in a small, space-saving package, making it **ideal for a wide range of locations**.

Fast and Effective

Built to increase charging efficiency, our charger is designed to get you back on the road quickly.

Dual Ports

With dual ports providing up to 47kW of power, you can charge two vehicles simultaneously, saving you time and energy.

Rapid Charging

Achieve up to 130 km of range in just 30 minutes, ensuring you're always ready for your next journey.

Ultra-Compact Design

Experience the power of DC charging in a sleek and compact design.

Flexible Installation

Choose between fixed or mobile positioning to adapt to your specific needs, ensuring convenience and versatility.

Low Installation Costs

The DC Compact is designed to minimize installation expenses, offering a faster return on investment (ROI) for site operators.

User-Friendly LCD Touch Screen

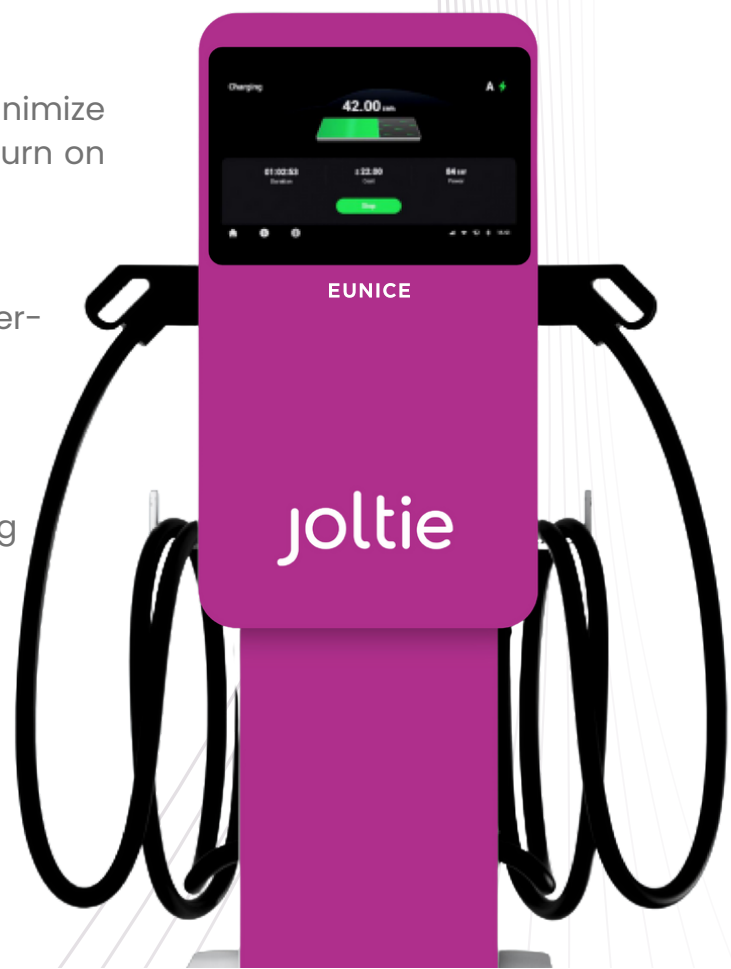

Enhance user engagement with a user-friendly 21.5-inch LCD touch screen.

Smart Operating System

Powered by Android 10, our charger offers advanced advertising placement, creating opportunities for additional revenue streams.

Communicate and Promote

Utilize the platform to communicate, promote, and attract customers, driving new revenue streams.

Advanced Features

OCPP Compliance

Ensure seamless integration with industry standards.

One-Stop Cloud Network Management

Streamline your charging infrastructure management with centralized control.

High Charging Efficiency

Achieve an impressive 96% charging efficiency, saving time and energy.

Plug & Charge

Enjoy the convenience of plug-and-charge functionality.

Smart Charging

Optimize charging processes for a seamless experience.

Compatibility

Support for CCS2, CHAdeMO, and various payment methods, including apps, RFID cards, credit cards, and mobile payments.
